

Indicator Latch

A durable nickel brush finished latch with built-in occupancy indicator is a standard feature on Hadrian’s Arch toilet partitions. The indicator shows green when available and red when occupied. For safety, the latch has an inconspicuous emergency access feature. Hadrian’s sleek design is fully ADA and CHC compliant and ensures quiet, smooth latch operation.

Headrail System

The Arch headrail system exudes designer flair and modern styling. The attractive tube design is very sturdy and comes equipped with a subtle anti-grip feature to deter vandalism. The headrail connections at pilaster and wall locations feature durable brackets that maintain the overall elliptical feel of the Arch system.

Hinge & Hinge Pin

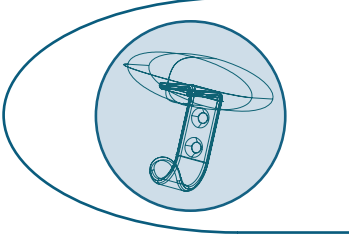

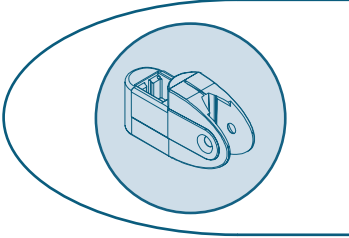

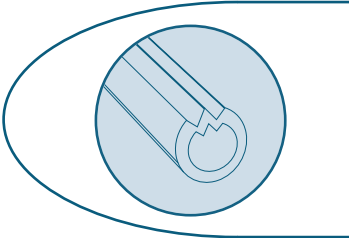

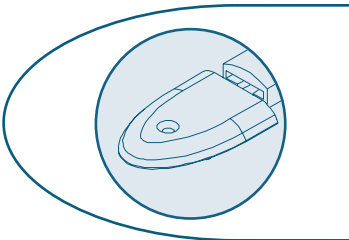

Hadrian’s full wrap-around hinge design and through-bolt construction adds strength and stability where doors connect to pilasters. Hadrian’s high-performance **metal hinge pin**, with a plastic nylon sleeve, counter-acts wear and ensures reliable, long-lasting performance.

Designer Coat Hook

Hadrian’s unique designer coat hook features a solid cast zinc hook and oversized black rubber bumper that functions as both a door-stop and bag hook.

Theft-proof 6-lobe fasteners

Arch fasteners are flush-mounted theft-proof 6-lobe security head stainless steel screws to deter vandalism.

Finishes

Hadrian’s Arch toilet partitions are available in polypropylene and polyethylene solid plastic and will not chip, flake, dent, rust or delaminate. In addition to being durable, Hadrian’s solid plastic allows most graffiti to be removed without unsightly “ghosting”. Please refer to Hadrian’s Solid Plastic Color Card.

Environmentally Friendly

Hadrian’s Arch toilet partitions are an environmentally responsible choice. In addition to having an excellent recycled content, the extended life-span of plastic means the need to replace old units is minimized and therefore less material is used over time.

Industry Leading Warranty.

With the best warranty in the business, Hadrian is confident that its partitions will stand the test of time. Hadrian’s Arch solid plastic warranty is good for 20 years and protects against breakage, delamination, and corrosion.

Arch

Solid Plastic

The Concept

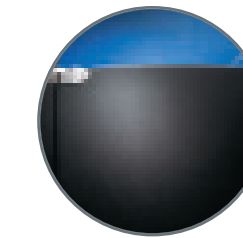

For years, Hadrian has exceeded industry standards while bringing the very best value to the market. In an effort to now introduce more choice and design flexibility, Hadrian has developed an innovative, industry-defining product: the Arch designer toilet partition. The Arch is like no toilet partition you've seen before - and as with all Hadrian products, outstanding service and support are integral parts of the package.

Bringing Curves to a Curve-less Industry

Through the union of design elegance and rugged durability, Hadrian has developed the Arch designer toilet partition. It is a fully engineered product that offers a fresh, sophisticated solution to the design needs of today's market. Featuring gently curved doors and panels, the Arch takes design flexibility to a new plateau. Careful attention has been given to every detail. From the innovative curves to the distinctive elliptical hardware, the Arch is an elegant and durable system that will satisfy the most exacting tastes.

The Arch takes **design flexibility**
to a new plateau

Built to Last

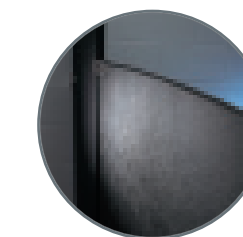

Hadrian products are designed to withstand abuse. Made from durable polypropylene or polyethylene material, the Arch will stand the test of time!

- Chemical resistant.
- Uniform color throughout.
- Most graffiti can be removed without "ghosting".
- Will not flake, delaminate, dent, crack, rust or break.
- Partitions never need to be repainted, and there is no need to replace rusted, dented or damaged parts.

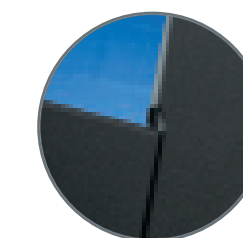

Elliptical Designer Hardware

Hadrian's Arch partitions have been meticulously engineered. All hardware has been specially designed to complement the system's distinctive panel and door curvatures. All hardware components are formed from Zamac 5, the hardest zinc die cast alloy available. Hardware has a #4 brushed nickel finish and pilaster shoes are #4 brushed stainless steel.

Cutting-Edge Technology

Due to advancements in solid plastic technology, it is no longer necessary to use 1" (25mm) thick material to erect a strong and rigid installation. Taking advantage of these latest technological strides, Hadrian's Arch toilet partitions are built with 3/4" (19mm) thick material. The result is a strong, durable, and rigid product that is lighter and more manageable than traditionally specified plastic partitions.

Integrated "No-Sightline" System

Hadrian's Arch toilet partitions feature an integrated "No-Sightline" system. Doors and pilasters overlap in an interlocking design that completely eliminates sightline gaps. This privacy-enhancing feature comes standard with the Arch system.
